(a) Complete slab families

$r_X,\ r_Z = \Theta(N)$ disjoint slabs

(b) Mixed logical classes

each qubit lies in at most two P_i

$\Delta \geq \frac{1}{2} \min\{r_X, r_Z\}$

(c) Static unitary restriction

$\Delta = \Theta(N)$

$d_\uparrow,\ d_\downarrow = \Theta(N^2)$

Logical Clifford

fixed depth and gate arity
